

NAB's petition 04-16: Reject it! Just because these folks have no interest in competition is no reason for MY government to limit MY services on xm that I pay for. Let them take their lobby money and spend it to improve their own technology. I may be only one voice, but now that I am aware of these yellow backed cowards attempt to have their tails saved by MY government, I guarantee I shant be the last you and our elected officials hear from. Please reject this bill. It would do nothing but weaken the competitive spirit that has pushed technology and our country so far.
